

C.P. CONTROLS

C.P. CONTROLS is your local source for Flow Control and On-Off Valve Products. We offer the broadest product lines available to meet your valve actuation requirements

Services & Capabilities

C.P. Controls offers a number of services to meet many of today's demanding applications. We maintain a qualified staff of instrumentation and control professionals with experience in many industries including: Refining, Oil & Gas, Steam, Petrochemical, Pharmaceuticals, Food & Beverage, Water Treatment and Power Generation.

ACTUATORS

Our selection includes Rack & Pinion, Diaphragm, Scotch Yoke, Electric, Linear Piston, and Specialty.

VALVES

Jamesbury, Flowseal, Centerline, Apollo, Nibco, ITT Engineered Valves, PBM, Spirax Sarco, Watts, Durabla, Strahman & Others

Valve Actuation

C.P. Controls' Automation team specializes in automating valves with pneumatic and electric actuators. We can mount virtually any type of actuator to any type, butterfly or ball valve to meet your specific automation needs. Actuation mounting and testing is done at our shop and custom brackets are available. Our team has over thirty years of valve automation experience and is available for field service calls.
